SUPPLEMENTAL:

On 08-02-22, while working in the Identification Bureau, I checked out Item 20 from the Property and Evidence Section. Item 20 contained two latent fingerprint cards related to an officer involved shooting investigation, which was submitted by FET Fix on 07-30-22.

I evaluated the latent impressions and determined there was not sufficient quality and quantity of friction ridge detail for a search for a potential match in the Cogent Automated Biometric Identification System (CABIS). I returned Item 20 to the Property and Evidence Section.
