SUPPLEMENTAL REPORT: Interview with Medic Eric Constantine

On August 4, 2022, at approximately 1319 hours, I spoke to Medic Eric Constantine via the telephone. This was in regard to a critical incident the Sonoma County Sheriff's was involved in on 7/29/2022. Constantine is a medic and works on Medic number 683 for BELL Ambulance.

Constantine was dispatched to a remote area in a vineyard off of Thomas Rd. by Redcom to provide medical assistance to the patient. Constantine was then airlifted to the area of the incident by Henry 1 in a remote creek area. As Constantine arrived, he noted Sonoma County Deputies were performing CPR on the down patient. One Deputy was doing chest compressions and the other was holding a chest seal over the patient's chest.

Constantine brought his equipment over to the patient who was lying on his back. He was advised by the Deputies that the patient had been shot in the head and in the chest.

Constantine observed the patient had a sweatshirt that had been cut away, dark pants and no shoes. He observed a bullet wound across the upper left arm, a chest entry wound to the left, and also blood coming out of the left ear.

Constantine hooked up the AED he had and told the Deputies to continue CPR. Constantine also applied a chest seal. Constantine observed the patience pupils were fixed and non-reactive. Constantine then noted the injury to the head was in fact a bullet wound and the patient had fluids coming from his nose area. At that point, Constantine ordered discontinue of efforts because of the injuries were not compatible with life.

Constantine pronounced the patient deceased at 1029 hours.

My interview with Constantine was audio recorded. I later booked the recording into SRPD Evidence. See the recording for further details regarding the incident.
