SUPPLEMENTAL:

On 7-29-22 at approximately 1030 hours, I was contacted by the Violent Crimes Investigation Supervisor, Sergeant Mathies, who advised me of an Officer Involved Shooting that had occurred in a rural area of Sonoma County. At approximately 1230 hours, I responded with the Santa Rosa Police Department Violent Crimes Investigation Team to the Sonoma County Sheriff's Office, located at 2796 Ventura Avenue.

At the Sheriff's Office, we received an initial brief of what had occurred and the location of the decedent, later identified as Suspect – David Pelaez-Chavez. Pelaez-Chavez location was described as approximately two miles Southeast of [redacted] Thomas Lane, in Geyserville, CA, in a ravine. The scene was secured by the Sonoma County Sheriff's Department and we were advised that the area was only accessible by helicopter.

After being briefed, the Santa Rosa Police Violent Crimes Investigation Team responded to a staging location, located at [redacted] Thomas Lane, in Geyserville. Once at the staging location, Sonoma County Sheriff's Department helicopter, call sign Henry 1, arrived and transported myself, Sergeant Matthies, and Field Evidence Technicians Fix and Brady to the scene of the shooting. Once on scene, we surveyed the area and the Field Evidence Technicians processed the scene.

At approximately 1900 hours, Marin County Deputy Coroner Alexandra Torres arrived on scene with Sonoma County Coroner Mike Peters. At approximately 1945 hours, Pelaez-Chavez was removed from the scene by the Marin County Deputy Coroner, with the assistance of the Sonoma County Sheriff's Department Helicopter. The Pelaez-Chavez body was released to the Marin County Coroner Torres.

On 7-30-22 at approximately 1000 hours, I met with Sonoma County Sheriff's Department Violent Crimes Detective Adrian Anaya and retrieved a flash drive containing Body Camera footage of the Officer Involved Shooting and camera footage from the Sonoma County Sheriff's Department Helicopter. At the Santa Rosa Police Department, I booked the flash drive into evidence.
