Supplemental:

[redacted] **TRE MONTE LANE HEALDSBURG**

On Friday, July 29, 2022, I was working as a detective assigned to the Violent Crimes Team. I was called to assist with an officer involved shooting (OIS) investigation. I responded to [redacted] Tre Monte Lane with Detective Rantissi where I was tasked with identifying and collecting evidence.

While at the scene, I had an opportunity to review surveillance video which was located at the residence. Detective Rantissi collected the video which was documented under a separate supplemental report. Refer to Detective Rantissi's supplemental report for details on collection and content.

While reviewing the video on scene I noted that a subject, later identified as David Pelaez, spit an unknown white object out of his mouth as he approached a decorative fountain in a courtyard on the east side of the residence. For reference, this fountain is a few feet away from the master bedroom door which Pelaez later broke by striking it with a large rock.

I searched the area near the fountain described above and located a piece of white rubber/plastic material. The object was in the area where I had noted Pelaez spit the unknown white object. I believed the object I located was the same object Pelaez had spit out of his mouth. I collected the object and later booked it in evidence as item #36.

Detective Rantissi located a pile of four large rocks near a flat parking area on the northwest side of the home. For reference, this is the same parking area where Pelaez stole a landscaper's pickup truck which was documented in separate a supplemental report. I noted that one of the rocks had what appeared to be blood on it. I collected the rock with suspected blood on it and later booked it in evidence as item #35.

While on scene, Field and Evidence Technician (FET) Rowsey and FET Fiori arrived and assumed evidence collection at the residence. Refer to FET Rowsey's supplemental report for further details regarding evidence collected at [redacted] Tre Monte Lane.

Disposition: Attach to the original report.
