Date/Time: **08/08/2022 10:50:00**

SUPPLEMENT:

SCENE PROCESSING:

On Friday, July 29, 2022, at approximately 1108 hours, I received a text message from On-Call Field Evidence Technician Allisha Fix, advising a critical incident had just occurred. Reportedly, the Sonoma County Sheriff's Office had an officer involved shooting and the Sonoma County Critical Incident protocol had been invoked with our agency. She requested my assistance with processing the scene and advised there would be a briefing at the Sheriff's Office at approximately 1230 hours.

At approximately 1130 hours, I arrived at the station and gathered my equipment. At approximately 1200 hours, I went en route to the SCSO Main building located at 2796 Ventura Ave., in Santa Rosa. Present at the briefing were numerous personnel from Santa Rosa Police Department, Sonoma County District Attorney's Office and SCSO. The briefing was conducted by SCSO Sgt. Leslie Bottomley where I learned the following in essence:

Starting at approximately 0730 hours, the SCSO dispatch began receiving multiple calls for service in regard to a Hispanic male adult who was reportedly vandalizing property and stealing vehicles in the area of [redacted] HWY 128 and Tremonte Ln. SCSO Deputies pursued the subject on foot into the remote wilderness terrain east of Thomas Rd. Reportedly, when the deputies contacted the subject, he had a hammer and a pickaxe in one hand and a rock in the other. The subject was not responding to repeat commands from the deputies to drop the weapons and made a movement toward them. A taser and a firearm were discharged. The subject was pronounced deceased at 1029 hours. We were advised the scene of the incident was located in a remote area that could not be accessed by a vehicle. The SCSO helicopter would have to transport us to the scene.

Following the briefing, it was decided FET Fix would be the primary technician on the scene and would be responsible for the scene description, evidence collection and photography. I would be responsible for video, scene diagram, and later attend the autopsy of the decedent. FET's Paula Fiori and Juliette Rowsey-Shaw were also present and assigned to process the deputies and involved vehicles. Refer to FET's Fix, Fiori, and Rowsey-Shaw's supplements for further.

At approximately 1415 hours, I went en route to [redacted] Thomas Rd. to meet with the SCSO helicopter to be transported to the scene. I arrived at 1440 hours and met with SRPD Violent Crime Investigations Sgt. Brandon Matthies and SCSO Dep. H. Campos.

At approximately 1525 hours, FET Fix and I were transported by helicopter to the scene. I signed in on the Major Incident Log with SCSO Dep. Trevor Doherty at approximately 1533 hours. The scene was located in a remote wilderness terrain, adjacent to the Franz Creek, with the approximate GPS coordinates of 38.61369970, -122.72236580.

Using my department issued iPhone and AXON App, I took a walk-through video of the scene (22-8672 Scene Video).

FET Fix completed taking the initial photographs of the scene and placed evidence flags next to the items of evidence to be collected. Refer to FET Fix's supplement for further.

Using the DJI Phantom 4 Pro sUAV (small unmanned aerial vehicle) (FA3ETYRPNN), I took a series of aerial photographs of the scene to later be used to assist with creating a factual diagram (22-8672 Drone).

Using my department issued iPhone and the Pix4Dcatch App, I walked the scene to collect a series of overlapping photographs. The photographs would later be used to assist with creating a factual diagram.

With the assistance of FET Fix, I then collected approximate hand measurements of the scene. I used the large tree located east of the creek bed and southwest of the body as reference point A (Tree A, approx. 38.61369027, -122.72242246). I used the large tree located northeast of the body as reference point B (Tree B, approx. 38.61370965, -122.72241407). I marked both trees with the letter's "A" and "B" in black Sharpie.

Marin County Sheriff's Office Deputy Coroner Alexandra Torres and SCSO Dep. Coroner Michael Peters arrived on scene to collect the body. With the assistance of SCSO Dep. Peters and MCSO Dep. Torres, FET collected the shirt from the body. She then provided me with the shirt to be transported back to [redacted] Thomas Rd. Refer to FET Fix's supplement for further. MCSO Dep. Torres advised the autopsy would be conducted on Tuesday, August 2, 2022, at 0930 in San Anselmo (CR 22-226).

At approximately 1924 hours, I signed out on the Major Incident Log with SCSO Dep. Scott McCracken. I returned to [redacted] Thomas Rd. by helicopter. I waited for FET Fix to arrive and gave her the shirt to be booked as evidence.

At approximately 2124 hours, I returned to the station and secured the scene photographs in the FET Office.
