VEHICLE PROCESSING: BLUE CHEVROLET SILVERADO 4D PICKUP CA/[redacted]:

On Wednesday, August 10, 2022, while on duty as a Field Evidence Technician, I received an email from Violent Crime Investigations Detective Gino Rantissi, who requested I process a vehicle for DNA and latent fingerprints. Det. Rantissi advised the vehicle was towed as evidence to Yarbrough Brothers Towing and that we had consent to search the vehicle from the owner.

At approximately 1217 hours, I responded to Yarbrough Brothers Towing Impound facility located at 3680 Santa Rosa Ave. and met with Det. Rantissi. I signed in on Yarbrough Brothers log at approximately 1222 hours.

I made the following observations in regard to the vehicle:

The vehicle, a blue 2014 Chevrolet Silverado 4D Pickup CA/[redacted], was parked in the center of the secured indoor storage facility, facing northbound. The exterior of the vehicle had thousands of scratches trailing from the front of the vehicle to the rear. The metal on the left front fender was peeled back and the left side-view mirror was broken off and hanging from the door by wires. The right front fender and side-view were damaged. There was wire fencing entangled around the right rear tire and part of the tread on the left rear tire was missing. There were numerous dents all over the exterior of the vehicle. Both the left and right front windows were open, and all the doors were unlocked. The left front door was damaged and required force to open.

The interior surface of the vehicle was mildly dirty with dust and minor stains. On the left front seat was a receipt dated in February. There were some tree leaves on the floorboards and center armrest. There was dirt smeared on the interior of the left front door, steering wheel, and left front seat. Three small spots of apparent blood were on the on the steering wheel airbag cover. The interior of the vehicle was relatively empty except for some sunglasses on the floorboard, yellow twine, and some face masks.

Using a Nikon D5600 DSLR camera, I took overall, midrange and close-up photographs of the interior and exterior of the vehicle.

Using sealed swabs moistened with sterile water, I collected a control swab and DNA trace swabs from the following locations: Exterior door handles, left front seatbelt release button, and steering wheel (ITEMS 48-54). I collected a sample swab of the apparent blood on the steering wheel airbag cover (ITEM 55).

I processed the interior and exterior of the vehicle for latent fingerprints, to include the interior rearview mirror, and the interior left and right front door handles. I observed a dusty fingerprint on the exterior of the left rear door. I photographed the fingerprint, with and without scale. I also successfully collected a lift of the fingerprint (ITEM 56).

Upon completion of processing the vehicle, Det. Rantissi conducted a search.

I signed out on the log at 1331 hours and returned to the station. I placed the items of evidence into SRPD Property and Evidence storage locker 22 at 1530 hours.

On Thursday, August 11, 2022, at approximately 0630 hours, I removed the latent fingerprint card and swabs from storage locker 22 and booked them into SRPD Property and Evidence, Safe Evidence Management (ITEMS 48-56).

I booked the photographs into SRPD Property and Evidence, Evidence.com (22-8672 Blue Chevy Silverado).
